

hello js

Mega App 2.0

GET /person/:id

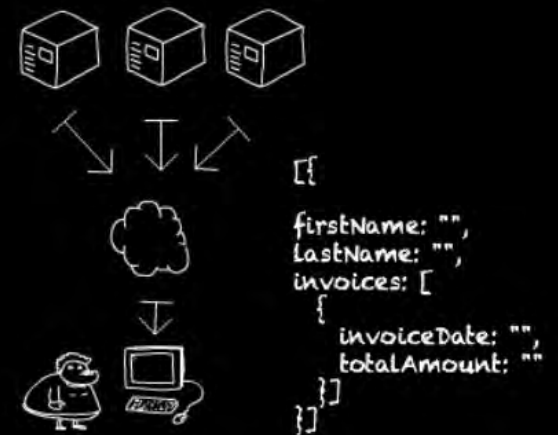

```
[{
  fullName: "John Smith",
  email: "john@syple.com",
  addresses: [
    {
      street: "2 Foveaux Street",
      suburb: "Surry Hills"
    }
  ]
}]
```

mean

```
var CustomerSchema = new Schema({
  fullName: String,
  email: { type: String, required: true, unique: true },
  address: {
    street: String,
    suburb: String
  }
});
```

```
app.get('/customers/:id', function (req, res) {  
  return CustomerModel.findById(req.params.id, function (err, customer) {  
    res.send(customer);  
  });  
});
```

mean

so what?
